End of Day Report. December 11.

USD INDEX. Buyers won the day and widened its recent tight trading range. Buyers looking above 106.50 while sellers will look below 106.

S&P 500. Buyers returned after taking the day off yesterday. The slow and steady uptrend continues. Buyers aiming above 6170 while sellers look below 6100.

GOLD. The bias has been up and buyers continued to maintain control as the \$2720 resistance level was set up. Buyers aiming at record \$2800 while sellers look below \$2700.

BRENT OIL. Buyers continue to drive prices further from the \$72 support area with a daily high of \$73.62. Buyers looking up at \$74 while sellers look below \$73.

BITCOIN. Buyers firmly in control with a close at \$101.9K. The low today was \$95.7K. With a \$6K daily range it's essential to have a well-designed trading strategy to accommodate the swings.
